TERMS OF SALE *and* SHIPPING

THE following offers are made subject to prior sale. Orders received are not binding until accepted in writing. After being accepted, they cannot be canceled except with my consent. All Bulbs and Roots are of good merchantable size. 25 will be billed at the 100 rate; 250 at the 1,000 rate. Smaller quantities at a higher rate. No substitutions will be made unless so ordered. Special quotations on large quantities. Goods delivered to forwarders are at the purchaser's risk. Purchasers must state whether goods shall be shipped by express or freight, and name the route desired. Telephone connection.

Terms of sale are net January 1, June 1, and October 1, subject to 5 per cent discount if paid within 30 days from date of invoice, 8 per cent discount if the cash accompanies the order. Interest will be charged on deferred payments.

Although I take all possible care to have everything true to name, and send out only healthy stock, it must be distinctly understood by the purchaser that I will not be responsible for the failure, description, quality, or productiveness of anything on this list. Any complaints arising should be made within five days after the receipt of the goods. Otherwise they cannot be considered.

Orders from unknown correspondents must be accompanied with cash or satisfactory reference. A reasonable price will be charged for cases and barrels.

HARDY LILIES

The Lilies and the irises may be considered the most beautiful of our hardy garden flowers, yet the Lilies undoubtedly are the more popular—for they are found in the little country dooryard as well as in the millionaire's formal garden. The nodding flowers of *Lilium speciosum* and *L. tenuifolium* add to the beauty of the simplest gardens, while the rich colors and sweet perfume of all the varieties bring every visitor to marvel at their purity and loveliness.

Lilies are at their best when planted among shrubs. To give protection to the tender shoots in early spring and summer you should select dwarf shrubs that bloom just before or at the same time as the Lilies; the spireas, deutzias and *Azalea mollis* are examples of suitable varieties. The

shrubs should be planted so that the Lilies will be sheltered and the ground shaded, but not so closely as to interfere with the growth of the bulbs.

Hansoni. A unique Lily, 3 to 4 feet high, with generous leaves in whorls; four to ten flowers, in a loose raceme. Orange-yellow, with chocolate spots; petals of great substance, lasting a long time in flower. Early, following <i>Tenuifolium</i> in the order of flowering.....	4 00	25 00	200 00
Henryi. The Yellow Speciosum. This is destined to be the Lily among Lilies. It is so healthy and sturdy, so hardy and beautiful, so easy to grow, that in time it will be in every garden, as the Tiger Lily is now. It grows, when established, 4 to 5 feet high, producing large panicles of orange-yellow flowers, banded with green..... each, 65c....	5 00	35 00

IRIS KAEMPFERI (Japan Iris)

These interesting and gorgeous flowers come into bloom about July 4, and make a grand show if planted in masses. They will grow in broad sunlight, but the warm sun soon destroys the flowers. To guard against this, it is well to plant them where they will be protected by shrubbery or tall-growing plants. If they can be planted in moist ground, the flowers will be much better than when grown in a dry place.

I offer these at \$6 per 100
